CONTENT OF TALK

COMMUNICATION SKILLS

Communication skills are very important when we go to the work life. We always need to ask something that we didn't understand to the leader to complete our project truly.

CREATIVE THINKING

We have to be creative thinking so we can produce a high quality product and easier for the user to use the apps or the website that we create.

PUNCTUALITY

The main thing that we have to consider as we have to complete the task on the right time so that it will ease others to proceed with our product.

SKILLS FOR TESTING ANALYST

Skills for testing analyst consists of analytical skills where it is needed to analyze software requirements, identify potential issues, and think critically to develop effective best cases.

SUMMARY

Future ICT employees must have the following attributes:

- Proficient in usage of different software
- Can communicate and cooperate
- Strong integrity and highly independent
- Diligent and constantly improving to minimize mistakes
- Able to think critically with high degree of meticulousness

REFLECTION

The thing I learn is that fresh graduate will also be judged by their own soft skills. I have to focus more on solving my own problem. Other than that I have to think outside the box while trying to solve new problems. Furthermore, being punctual shows that we are serious while dealing with anything.

DOCUMENTATION SKILLS

Documentation skills are also important as we have to use it in creating test plans, test cases and bug reports.

TIME MANAGEMENT

Time management is also important as we want to ensure that testing activities are completed during the timeline.

CONTINUOUS LEARNING

Always update to the latest technology because technology constantly evolves.

ATTENTION TO DETAIL

Pay attention to tiny errors so we can avoid error in the whole system and minimize mistakes that affect the overall system.

PRACTICAL KNOWLEDGE

During studies, focus leans towards theoretical, while in the work applying practical knowledge is important to address real-time challenges.

ALWAYS CURIOUS

Engage more in grouping while studies and learn to ask more questions so that we can understand more.
